

ever, the cases in the two opossums described here showed signs that infection may have occurred by this route. Adequate cooking should be stressed in those geographical areas where this animal is used for food.

A WELCOME TO NEW MEMBERS AND SUBSCRIBERS

The Wildlife Disease Association cordially welcomes into the Association the new members and subscribers listed above. The WDA hopes that through its two journals, these new friends will maintain a continuing interest in the objectives of the Association and that this interest will ultimately be of benefit to themselves and to science.

A REMINDER TO CONTINUING MEMBERS

Those members of the Association who have not yet paid their dues for 1968 are requested to send in their \$5.00 payment soon. Members not paid up by April 1, 1968 will have their names withdrawn from the mailing list until their dues are received.

The WILDLIFE DISEASE ASSOCIATION is dedicated to the conservation of wildlife through sharing the study and understanding of diseases of wild animals. The object of the Association is to advance knowledge of the effect of infectious, parasitic and physiologic diseases and other factors upon the health and survival of free-living and captive wild animals, upon populations of wild animals and upon their relationship to man.

Membership in the Association is open to anyone interested in accomplishing the above objective and may be obtained by submission of name, address and yearly dues to the business office of the Association. Current dues are five dollars per year and include subscriptions to the quarterly BULLETIN and to microprint issues of WILDLIFE DISEASE. All institutional subscriptions are ten dollars per annum.

Research Papers on Diseases of Fish, other Ectothermic Vertebrates, and Invertebrates, Welcomed

At its 1967 annual meeting, the Council of the WDA emphasized that the term "wildlife" embraces all free-living species of the animal kingdom; therefore, the Council specifically encouraged investigators of diseases of fish, other ectothermic vertebrates, and invertebrates, to participate in the Association. They are most welcome to become members of the Association and to submit manuscripts pertaining to their research to the editors of either of the Association's two journals for publication: the quarterly, **Bulletin of the Wildlife Disease Association** or the microprint journal **Wildlife Disease**.
